Thin Solid Films 300 (1997) 317–320

thin solid films

Subject Index of Volume 300

Acoustic microscopy
Quantitative acoustic microscopy for characterization of the interface strength of diamond-like carbon thin films, 42
Adhesion
Diamond deposition onto WC–6%Co cutting tool material: coating structure and interfacial bond strength, 164
Quantitative acoustic microscopy for characterization of the interface strength of diamond-like carbon thin films, 42
Study of the delamination of diamond coatings under thermal stress, 189
Adsorption
Adsorption of proteins on electro-conductive polymer films, 265
Aluminium
Determination of hydrogen absorption in Pd coated Al thin films, 295
Electromigration failures in line-stud structures as a function of line length, 278
Electromigration in layered Al lines studied by in-situ ultra-high voltage electron microscopy, 25
Aluminum
Formation of amorphous anodic oxide films of controlled composition on aluminium alloys, 131
Amorphous materials
Thermal stability and crystallization of amorphous $Si_{1-x}B_x$, $Si_{1-x}P_x$ and $Si_{1-x}Sb_x$ alloy thin films, 51
Annealing
Microstructural changes of Pt/Ti bilayer during annealing in different atmospheres — an XRD study, 122
The effect of rapid thermal annealing on structural and electrical properties of TiB_2 thin films, 272
Anodic oxidation
Formation of amorphous anodic oxide films of controlled composition on aluminium alloys, 131
Atomic force microscopy
Specular beam intensity and surface morphology of BSCO films grown by MBE, 223
Studies using AFM and STM of the correlated effects of the deposition parameters on the topography of gold on mica, 84
Atomic force microscopy (AFM)
Microstructure modification of amorphous titanium oxide thin films during annealing treatment, 113
Stability of dimethyldioctadecylammonium bromide Langmuir–Blodgett films on mica in aqueous salt solutions—implications for surface force measurements, 240
Auger depth profiling
Oxidation behavior of $(Ti_{1-x}Al_x)N$ films prepared by r.f. reactive sputtering, 171
Auger electron spectroscopy
An organic antitarnish coating on tinplate, 159

Barrier interlayers
Diamond films deposited on WC–Co substrates by use of barrier interlayers and nano-grained diamond seeds, 18

Biomaterials
Adsorption of proteins on electro-conductive polymer films, 265
Boron
Stability of plasma-deposited amorphous hydrogenated boron films, 101
Boron nitride
Structural models for epitaxy of hexagonal phases of boron nitride on Si(001), 78

Carbides
Diamond deposition onto WC–6%Co cutting tool material: coating structure and interfacial bond strength, 164
Chemical sensors
Conductivity model for sputtered ZnO-thin film gas sensors, 30
Chemical vapor deposition (CVD)
Deposits obtained by photolysis of hexamethyldisilane by ArF excimer laser (SiC thin film preparation by ArF excimer laser chemical vapor deposition, Part 2), 95
Chemical vapour deposition (CVD)
Study of the delamination of diamond coatings under thermal stress, 189
Coating
An organic antitarnish coating on tinplate, 159
Coatings
Determination of hydrogen absorption in Pd coated Al thin films, 295
Ring etching zones on magnetron sputtering targets, 72
Study of the delamination of diamond coatings under thermal stress, 189
Computer simulation
Comparison between an elastic–perfectly plastic finite element model and a purely elastic analytical model for a spherical indenter on a layered substrate, 177
Formation energies of two-dimensional nuclei randomly-generated on (001), (110), and (111) planes of a face-centered-cubic crystal, 305
Conductivity
Adsorption of proteins on electro-conductive polymer films, 265
Semifluorinated TTF derivatives in Langmuir–Blodgett films, 228
Contacts
Comparison between an elastic–perfectly plastic finite element model and a purely elastic analytical model for a spherical indenter on a layered substrate, 177
Formation of WSi-based ohmic contacts to n-type GaAs, 218
Corrosion
Cyclic voltammetric, a.c. and d.c. polarization behavior of boron-doped CVD diamond, 144
Ring etching zones on magnetron sputtering targets, 72
Crystallization
Preparation of highly *c*-axis-oriented $Bi_4Ti_3O_{12}$ thin films and their crystallographic, dielectric and optical properties, 299
Thermal stability and crystallization of amorphous $Si_{1-x}B_x$, $Si_{1-x}P_x$ and $Si_{1-x}Sb_x$ alloy thin films, 51

Elsevier Science S.A.

Deposition process
Formation energies of two-dimensional nuclei randomly-generated on (001), (110), and (111) planes of a face-centered-cubic crystal, 305
Depth profiling
Zn diffusion of $In_{0.5}Ga_{0.5}P$ investigated by photoluminescence measurements, 284
Diamond
Cyclic voltammetric, a.c. and d.c. polarization behavior of boron-doped CVD diamond, 144
Diamond deposition onto WC–6%Co cutting tool material: coating structure and interfacial bond strength, 164
Quantitative acoustic microscopy for characterization of the interface strength of diamond-like carbon thin films, 42
Study of the delamination of diamond coatings under thermal stress, 189
Diamond films
Diamond films deposited on WC–Co substrates by use of barrier interlayers and nano-grained diamond seeds, 18
Dielectric properties
Deposition of $BaTiO_3$ thin films by plasma MOCVD, 6
Preparation of highly *c*-axis-oriented $Bi_4Ti_3O_{12}$ thin films and their crystallographic, dielectric and optical properties, 299
Structural, electrical, and optical studies on rapid thermally processed ferroelectric $BaTiO_3$ thin films prepared by metallo-organic solution deposition technique, 289
Diffusion
Electromigration failures in line-stud structures as a function of line length, 278
Zn diffusion of $In_{0.5}Ga_{0.5}P$ investigated by photoluminescence measurements, 284

Elastic properties
Quantitative acoustic microscopy for characterization of the interface strength of diamond-like carbon thin films, 42
Electrical properties
Conductivity model for sputtered ZnO-thin film gas sensors, 30
Electrical properties and measurement
Engineering the *I–V* characteristics of an asymmetric double barrier device with variable period GaAs/AlAs superlattice injectors, 202
Electrical properties and measurements
Charge transport in vacuum-sublimed films of metal-free tetraphenylporphyrin and its relation to capacitance and photocurrent measurements, 213
Structural, electrical, and optical studies on rapid thermally processed ferroelectric $BaTiO_3$ thin films prepared by metallo-organic solution deposition technique, 289
The effect of rapid thermal annealing on structural and electrical properties of TiB_2 thin films, 272
Electrochemistry
Cyclic voltammetric, a.c. and d.c. polarization behavior of boron-doped CVD diamond, 144
Electromigration
Electromigration failures in line-stud structures as a function of line length, 278
Electromigration in layered Al lines studied by in-situ ultra-high voltage electron microscopy, 25
Electron diffraction
Electromigration in layered Al lines studied by in-situ ultra-high voltage electron microscopy, 25
Electronic devices
Engineering the *I–V* characteristics of an asymmetric double barrier device with variable period GaAs/AlAs superlattice injectors, 202
Electron microscopy
Electromigration in layered Al lines studied by in-situ ultra-high voltage electron microscopy, 25
Elliptic functions
Resistance calculations for thin film rectangles, 256
Epitaxy
Structural models for epitaxy of hexagonal phases of boron nitride on Si(001), 78
Evaporation
Electrical properties of evaporated polycrystalline Ge thin–films, 138
Fractal structure and optical properties of semicontinuous silver films, 1
The effect of rapid thermal annealing on structural and electrical properties of TiB_2 thin films, 272

Factor analysis
Formation energies of two-dimensional nuclei randomly-generated on (001), (110), and (111) planes of a face-centered-cubic crystal, 305
Field ion microscopy
Diamond deposition onto WC–6%Co cutting tool material: coating structure and interfacial bond strength, 164
Fourier transform infrared spectroscopy
Stability of plasma-deposited amorphous hydrogenated boron films, 101

Gallium arsenide
Formation of WSi-based ohmic contacts to n-type GaAs, 218
Germanium
Electrical properties of evaporated polycrystalline Ge thin–films, 138
Growth mechanism
Formation energies of two-dimensional nuclei randomly-generated on (001), (110), and (111) planes of a face-centered-cubic crystal, 305
Influence of substrate properties on the growth of titanium films: Part II, 11
Specular beam intensity and surface morphology of BSCO films grown by MBE, 223

Hall measurements
Conductivity model for sputtered ZnO-thin film gas sensors, 30
Heat treatment
Electrical properties of evaporated polycrystalline Ge thin–films, 138
Influence of substrate properties on the growth of titanium films: Part II, 11
Helium
Combined impurity gettering effects of helium-induced cavities and oxygen precipitates created by plasma immersion ion implantation, 64
High energy electron diffraction
Specular beam intensity and surface morphology of BSCO films grown by MBE, 223
Hydrogen
Determination of hydrogen absorption in Pd coated Al thin films, 295
Stability of plasma-deposited amorphous hydrogenated boron films, 101

Infrared spectroscopy
Semifluorinated TTF derivatives in Langmuir–Blodgett films, 228
Interfaces
Cyclic voltammetric, a.c. and d.c. polarization behavior of boron-doped CVD diamond, 144
Ion bombardment
Ring etching zones on magnetron sputtering targets, 72

Langmuir–Blodgett films
A new type of organic–inorganic multilayer: fabrication and photoelectric properties, 208
Semifluorinated TTF derivatives in Langmuir–Blodgett films, 228

Langmuir–Blodgett films (LB films)
Thin films of liquid crystal fumarates and a related acrylate, 234
Langmuir-Blodgett films (LB films)
Stability of dimethyldioctadecylammonium bromide Langmuir–Blodgett films on mica in aqueous salt solutions—implications for surface force measurements, 240
Laser ablation
Laser deposition of oriented $BiMeVO_x$ films, 154
Liquid phase epitaxy
Zn diffusion of $In_{0.5}Ga_{0.5}P$ investigated by photoluminescence measurements, 284

Magnetic properties and measurements
$(Fe,Ti)_{16}N_2$ films with high saturation magnetization prepared by facing target sputtering, 59
Metal–oxide semiconductor structure (MOS)
Structural, electrical, and optical studies on rapid thermally processed ferroelectric $BaTiO_3$ thin films prepared by metallo-organic solution deposition technique, 289
Metals
Fractal structure and optical properties of semicontinuous silver films, 1
Molecular beam epitaxy
Specular beam intensity and surface morphology of BSCO films grown by MBE, 223
Molecular beam epitaxy (MBE)
Engineering the *I–V* characteristics of an asymmetric double barrier device with variable period GaAs/AlAs superlattice injectors, 202
Monolayers
Comparison between an elastic–perfectly plastic finite element model and a purely elastic analytical model for a spherical indenter on a layered substrate, 177
Stability of dimethyldioctadecylammonium bromide Langmuir–Blodgett films on mica in aqueous salt solutions—implications for surface force measurements, 240
Multilayers
Non-linear optical effects in layer-by-layer alternate films of polycations and an azobenzene-containing polyanion, 107

Nano-grained diamond seeds
Diamond films deposited on WC–Co substrates by use of barrier interlayers and nano-grained diamond seeds, 18
Nanostructures
A new type of organic–inorganic multilayer: fabrication and photoelectric properties, 208
Nitrides
$(Fe,Ti)_{16}N_2$ films with high saturation magnetization prepared by facing target sputtering, 59
Oxidation behavior of $(Ti_{1-x}Al_x)N$ films prepared by r.f. reactive sputtering, 171

Optical properties
Fractal structure and optical properties of semicontinuous silver films, 1
Microstructure modification of amorphous titanium oxide thin films during annealing treatment, 113
Preparation of highly *c*-axis-oriented $Bi_4Ti_3O_{12}$ thin films and their crystallographic, dielectric and optical properties, 299
Structural, electrical, and optical studies on rapid thermally processed ferroelectric $BaTiO_3$ thin films prepared by metallo-organic solution deposition technique, 289
Organic substances
Charge transport in vacuum-sublimed films of metal-free tetraphenylporphyrin and its relation to capacitance and photocurrent measurements, 213
Organometallic vapor deposition
Deposition of $BaTiO_3$ thin films by plasma MOCVD, 6
Oxidation
Oxidation behavior of $(Ti_{1-x}Al_x)N$ films prepared by r.f. reactive sputtering, 171
Oxides
Laser deposition of oriented $BiMeVO_x$ films, 154
Oxygen
Combined impurity gettering effects of helium-induced cavities and oxygen precipitates created by plasma immersion ion implantation, 64

Palladium
Determination of hydrogen absorption in Pd coated Al thin films, 295
Phase transitions
Microstructure modification of amorphous titanium oxide thin films during annealing treatment, 113
Thermal stability and crystallization of amorphous $Si_{1-x}B_x$, $Si_{1-x}P_x$ and $Si_{1-x}Sb_x$ alloy thin films, 51
Phosphine
Electromigration failures in line-stud structures as a function of line length, 278
Photovoltage
A new type of organic–inorganic multilayer: fabrication and photoelectric properties, 208
Physical vapour deposition
Charge transport in vacuum-sublimed films of metal-free tetraphenylporphyrin and its relation to capacitance and photocurrent measurements, 213
Studies using AFM and STM of the correlated effects of the deposition parameters on the topography of gold on mica, 84
Physical vapour deposition (PVD)
Microstructure modification of amorphous titanium oxide thin films during annealing treatment, 113
Thin films of liquid crystal fumarates and a related acrylate, 234
Plasma processing and deposition
Combined impurity gettering effects of helium-induced cavities and oxygen precipitates created by plasma immersion ion implantation, 64
Deposition of $BaTiO_3$ thin films by plasma MOCVD, 6
Stability of plasma-deposited amorphous hydrogenated boron films, 101
Platinum
Microstructural changes of Pt/Ti bilayer during annealing in different atmospheres — an XRD study, 122
Polymers
Adsorption of proteins on electro-conductive polymer films, 265
Non-linear optical effects in layer-by-layer alternate films of polycations and an azobenzene-containing polyanion, 107
Thin films of liquid crystal fumarates and a related acrylate, 234

Raman scattering
Diamond deposition onto WC–6%Co cutting tool material: coating structure and interfacial bond strength, 164
Resistivity
Resistance calculations for thin film rectangles, 256
Rutherford backscattering spectroscopy
Formation of amorphous anodic oxide films of controlled composition on aluminium alloys, 131

Scanning electron microscopy
Laser deposition of oriented $BiMeVO_x$ films, 154
Scanning tunneling microscopy
Studies using AFM and STM of the correlated effects of the deposition parameters on the topography of gold on mica, 84
Scanning tunnelling microscopy
The effect of rapid thermal annealing on structural and electrical properties of TiB_2 thin films, 272

Second-harmonic generation
Non-linear optical effects in layer-by-layer alternate films of polycations and an azobenzene-containing polyanion, 107
Semiconductors
Charge transport in vacuum-sublimed films of metal-free tetraphenylporphyrin and its relation to capacitance and photocurrent measurements, 213
Silicides
Thermal stability and crystallization of amorphous $Si_{1-x}B_x$, $Si_{1-x}P_x$ and $Si_{1-x}Sb_x$ alloy thin films, 51
Silicon
Structural models for epitaxy of hexagonal phases of boron nitride on Si(001), 78
Silicon carbide
Deposits obtained by photolysis of hexamethyldisilane by ArF excimer laser (SiC thin film preparation by ArF excimer laser chemical vapor deposition, Part 2), 95
Silver
Fractal structure and optical properties of semicontinuous silver films, 1
Solid electrolyte interface
Laser deposition of oriented $BiMeVO_x$ films, 154
Sputtering
$(Fe,Ti)_{16}N_2$ films with high saturation magnetization prepared by facing target sputtering, 59
Formation of WSi-based ohmic contacts to n-type GaAs, 218
Preparation of highly *c*-axis-oriented $Bi_4Ti_3O_{12}$ thin films and their crystallographic, dielectric and optical properties, 299
Ring etching zones on magnetron sputtering targets, 72
Stress
Comparison between an elastic–perfectly plastic finite element model and a purely elastic analytical model for a spherical indenter on a layered substrate, 177
Electromigration failures in line-stud structures as a function of line length, 278
Influence of substrate properties on the growth of titanium films: Part II, 11
Structural properties
Microstructural changes of Pt/Ti bilayer during annealing in different atmospheres — an XRD study, 122
Structural models for epitaxy of hexagonal phases of boron nitride on Si(001), 78
Superlattices
Engineering the *I–V* characteristics of an asymmetric double barrier device with variable period GaAs/AlAs superlattice injectors, 202
Surface and interface states
Deposition of $BaTiO_3$ thin films by plasma MOCVD, 6
Surface morphology
Studies using AFM and STM of the correlated effects of the deposition parameters on the topography of gold on mica, 84
Surface pressure
Semifluorinated TTF derivatives in Langmuir–Blodgett films, 228
Surface stress
The effect of copper implantation on the mechanical, structural properties and residual stress of polycrystalline alumina, 197
Surface structure
The effect of copper implantation on the mechanical, structural properties and residual stress of polycrystalline alumina, 197

Tin
An organic antitarnish coating on tinplate, 159
Titanium
Growth of Ti:sapphire single crystal thin films by pulsed laser deposition, 68
Influence of substrate properties on the growth of titanium films: Part II, 11
Microstructural changes of Pt/Ti bilayer during annealing in different atmospheres — an XRD study, 122
Titanium oxide
A new type of organic–inorganic multilayer: fabrication and photoelectric properties, 208
Transmission electron microscopy (TEM)
$(Fe,Ti)_{16}N_2$ films with high saturation magnetization prepared by facing target sputtering, 59
Formation of amorphous anodic oxide films of controlled composition on aluminium alloys, 131
Transmission electron microscopy
Formation of WSi-based ohmic contacts to n-type GaAs, 218

Wetting
Stability of dimethyldioctadecylammonium bromide Langmuir–Blodgett films on mica in aqueous salt solutions—implications for surface force measurements, 240

X-ray diffraction
Growth of Ti:sapphire single crystal thin films by pulsed laser deposition, 68
Microstructural changes of Pt/Ti bilayer during annealing in different atmospheres — an XRD study, 122
Oxidation behavior of $(Ti_{1-x}Al_x)N$ films prepared by r.f. reactive sputtering, 171
The effect of copper implantation on the mechanical, structural properties and residual stress of polycrystalline alumina, 197
Thin films of liquid crystal fumarates and a related acrylate, 234
X-ray photoelectron spectroscopy
An organic antitarnish coating on tinplate, 159

Zinc
Zn diffusion of $In_{0.5}Ga_{0.5}P$ investigated by photoluminescence measurements, 284
